PETITION UNDER 37 C.F.R. §1.53(e)(2) TO BE ACCORDED FILING DATE AND FILING RECEIPT

Dear Sir:

Applicants respectfully petition under 37 C.F.R. §1.53(e)(2) that the original filing date of April 21, 2004 be accorded to the above-referenced patent application. A Notice of Incomplete Nonprovisional Application was mailed by the OIPE on July 1, 2004, contending that the application was deficient for not including drawings. However, Applicants respectfully submit that drawings are not necessary for the understanding of the subject matter sought to be patented, under 35 U.S.C. §113 (first sentence).

Specifically, all of the claims of the present application are directed to methods for making alkyl esters or products produced according to those methods. MPEP §608.02 states that:

An OIPE formality examiner should not treat an application without drawings as incomplete if drawings are not required. A drawing is not required for a filing date under 35 U.S.C. 111 and 113 if the application contains:

- (A) at least one process claim including the term "process" or "method" in its introductory phrase;
- (B) at least one composition claim including the term "composition," "compound," "mixture" or "pharmaceutical" in its introductory phrase.

* * * *

In the present application, <u>every</u> claim is directed to either a method or product made according to a claimed method, and therefore, drawings <u>are not required</u>.

It appears, however, that the Notice of Incomplete Nonprovisional Application was sent by the OIPE because the specification as filed incorrectly made reference to eight missing figures. The references to these eight figures, however, stated that they described testing results and properties only, and therefore were not necessary for the understanding of the invention. Accordingly, Applicants also include with this petition an Amendment to the Specification, to delete the references to the figures in the specification. Applicants believe that this Amendment, in light of the claims as filed (which include at least one process claim), satisfy the OIPE's Notice, and respectfully request that the original filing date of April 21, 2004 be accorded to this application.

In the alternative, the Applicants respectfully submit that the OIPE incorrectly refused to accord this application a filing date, notwithstanding the references in the specification to the missing unnecessary figures. MPEP 606.01(f) states:

"A nonprovisional application having at least one claim, or a provisional

application having at least some disclosure, directed to the subject matter discussed above for which a drawing is usually not considered essential for a filing date, describing drawing figure(s) in the specification, but filed without drawings will be treated as an application filed without all of the drawing figures referred to in the specification as discussed in MPEP §601.01(g), so long as the application contains something that can be construed as a written description. (emphasis added).

Accordingly, MPEP 601.01(g) states that a Notice of Omitted Items should have been mailed, rather than a Notice of Incomplete Nonprovisional Application, and a filing date should have been accorded to this application. Applicants would have then had the option of accepting the application as deposited in the USPTO, without the referenced drawings, but retaining the original filing date. Applicants could then amend the specification in the same way to delete reference to the missing, unnecessary drawings.

Therefore, under either basis, Applicants respectfully petition the Commissioner to accord the instant application the original filing date of April 21, 2004, and respectfully request a filing receipt which so reflects. Additionally, Applicants enclose the required petition fee of \$130.00 under 37 C.F.R. §1.17(h), and proof of original filing, but request that the fee be refunded and credited to Deposit Account No. 13-0017, in the name of McAndrews, Held & Malloy, Ltd., upon grant of the petition.

Respectfully Submitted,

Christopher M. Scharff Attorney for Applicants

PRELIMINARY AMENDMENT

Reg. No. 53,556

Dear Sir:

In connection with the attached petition under 37 C.F.R. §1.53(e)(2), to be accorded the filing date of April 21, 2004, the Applicants request entry of the following amendment to remove reference to unnecessary Figures 1-8.

Amendments to the Specification begin on page 2.

Amendments to the Specification:

Please amend the specification as follows:

On page 3, please delete paragraphs 0012-0015;

On page 4, please delete paragraphs 0016-0019;

On page 8, please amend paragraph 0034 as follows:

Figure 3 to 6 further demonstrate the transesterification of glycerides in Run 1. Figure 3 shows the results for a H-NMR for acidulated soap stock. Figure 4 shows the results for a H-NMR for a known biodiesel reference. Figure 5 shows the results for a H-NMR for Run 1 at 15 minutes. Figure 6 shows the results for a H-NMR for Run 1 at 120 minutes. Comparison of H-NMR for acidulated soap stock, known biodiesel reference, and Run 1 at 15 and 120 minutes the graphs of Figure 3 through 6 illustrates the reduction in the presence of glycerides and an increase in the presence of methyl esters showed that glycerides were reduced and methyl esters were increased.

On page 17, please amend paragraph 0052 as follows:

Figures 7 and 8 show the results for a H NMR for Runs 6 and 7, respectively. Figures 7 and 8 H-NMR results for Runs 6 and 7 did not reveal any side reactions taking place under the conditions of the reaction scheme, indicating that the reaction scheme of the present invention may be the subject of a continuous process. Additionally, H-NMR for Run 7 Figure 8 confirmeds that the higher reaction temperature of Run 7 does not have a negative effect as far as decomposition is concerned.

CONCLUSION

Applicants respectfully request entry of the foregoing preliminary amendment to the specification. Please charge any additional fees or credit any overpayment to Deposit Account No. 13-0017, in the name of McAndrews, Held, & Malloy, Ltd.

Respectfully Submitted,

Christopher M. Scharff
